Progress & Feedback

Interactive Science Learning Through Play

Learn Science By Making Connections

The interactive card-matching game built for Secondary School Science Learning. Build confidence across biology, chemistry, and physics by matching concepts, recognizing patterns and making connections ~~true~~ through active learning, not passive reading.

How It Works

🎓 Curriculum-Aligned Science Learning

💙 Designed for Different Learning Needs

🛡️ Choose Your Curriculum and Learning Stage

🛡️ Ad-free Learning

Reduce Spacing

Why Learn Through Card-Matching ?

SciSolitaire turns retrieval practice into short matching challenges. **Learners** actively recall information, recognize relationships between concepts and receive feedback they as play.

Can this be 3 lines
instead of 4?

Active Recall

Matching prompts learner to ~~retrieve~~ **learners retrieve** information and recognise relationships rather than ~~simply~~ re-read notes.

Topic by Topic

Each deck covers one ~~GCSE or KS3~~ **science** ~~chemistry~~ topic in depth. Focus on what matters most for your upcoming assessments.

Progress Rewarded

Earn coins for every correct match. Track your score, completion time, and hints used — celebrating progress at every step.

Designed for Everyone

~~Plain English mode~~ **Simple English**, adjustable text size, high contrast, and reduced motion make Chemistry Solitaire accessible to all learners.
