# Chemistry Revision That Actually Works

Learn Science  
By making  
the connections.

The card-matching game built around GCSE and Key Stage 3 Science subjects. Chemistry. Master Atomic Structure, Chemical Bonding, and the Periodic Table through active retrieval — not passive reading.

The interactive card-matching game built for Secondary science learning. Build confidence across Biology, Chemistry and Physics by matching concepts, recognising patterns and making connections.

Spacing

## Why Card-Matching Works Better

Why Learn Through Card-Matching

Active retrieval practice builds stronger long-term memory than re-reading notes. Chemistry Solitaire puts this research into practice.

SciSolitaire turns retrieval practice into short matching challenges. Learners actively recall information, recognise relationships between concepts and receive feedback as they play.

# Why Card-Matching Works Better

Active retrieval practice builds stronger long-term memory than re-reading notes. Chemistry Solitaire puts this research into practice.

Spacing

## ↑ space Active Recall

Matching chemistry cards forces your brain to actively retrieve information — building stronger, longer-lasting memory connections than passive revision.

## ↑ space Topic by Topic

Each deck covers one GCSE or KS3 chemistry topic in depth. Focus on what matters most for your upcoming assessments.

## ↑ space Progress Rewarded

Earn coins for every correct match. Track your score, completion time, and hints used — celebrating progress at every step.

## ↑ space Designed for Everyone

Plain English mode, adjustable text size, high contrast, and reduced motion make Chemistry Solitaire accessible to all learners.

Matching prompts learners to retrieve information and recognise relationships rather than simply re-read notes.

building stronger, longer lasting  
memory connections than passive  
revision.

what matters most for post-learning  
assessments.

little data - celebrating progress at  
every step.

One Game. Two Views.

#### For Learners

- ✓ Play short curriculum-aligned matching games
- ✓ Get immediate explanations after matches and mistakes
- ✓ Track topics, accuracy and progress
- ✓ Repeat difficult areas at their own pace

#### For Teachers

- ✓ See individual and class performance
- ✓ Identify concepts pupils repeatedly struggle with.
- ✓ Track participation and topic progress
- ✓ Use gameplay insights to target revision and support.
